

# Ultra Tap Sleeve

The Ultra Tap Sleeve is a watertight feature that helps reduce water ingress into HPL substrates to prevent bulging or swelling of benchtops around the tap and sink area

- Tap, finished internal diameter **38mm** hole
- Air switch, finished internal diameter **32mm** hole

Tap and Air switch center will always be 40mm from the edge of sink insert,  
But can be placed anywhere along this line ( Black dotted Line )
